contact

hello!

I'm a Designer and UI Developer with over 10 years of experience across branding, marketing design, User Experience (UX) design, and AI driven design. I partner with diverse technical and business teams to shape scalable web and mobile products, from brand identity and marketing campaigns to interfaces and design systems. I build the frameworks and tools behind that work, automating workflows and adding structure and speed to the design process.

I care as much about craft as I do about strategy, aligning business goals with user needs and managing stakeholder expectations through every phase of a project. Whether it's a brand system, a product interface, or an automated workflow, I aim for the same thing: design that feels intentional, cohesive, and true to the brand.

interests

Fueled by caffeine, obsessed with drumming, dreaming of a world tour on my bike. Proud mom to two royal feline dictators. Writing takes me to another universe, and Xbox? My focus could rival a laser beam!

experience

BLUENET - cliexa

2026 - present

AI-Driven Digital Designer

Key Skills: Brand Strategy, Visual Design, UI/UX Design, Landing Page Design, Marketing Framework, Marketing Collateral Design, Design Systems, Agile Methodologies
